

JUAN MANUEL CELY B.Sc

EDUCATION	Ecology and Evolutionary Biology, University of Michigan	Ann Arbor, USA
	<i>Ph.D. in Ecology</i>	2024 – 2029 (<i>expected</i>)
	Advisor: Professor Natalia Umaña Research area: Forest Ecology and Plant Hydraulics	
	Biology Department, Universidad Nacional de Colombia	Bogotá, Colombia
	<i>B.Sc. in Biology</i>	2017 – 2023
	Advisor: Professor Beatriz Salgado-Negret Thesis: Seedlings intraspecific responses to water availability variation	
PAPERS	<i>In prep.</i> Cely J.M., González-Melo, A., ..., & Umaña, M. N. Hydraulic Strategies in the Regeneration Niche Predict Species Abundance Across Ontogeny.	
	<i>Submitted.</i> Cely J.M., González-Melo, A., ..., Umaña, M. N. Linking stem hydraulic conductivity to whole-plant function and demography in tropical dry forests.	
	<i>Submitted.</i> González-Melo, A., Cely J.M., ..., Umaña, M. N. How functional is the spatial arrangement of wood parenchyma cells? Evidence from tropical dry forest seedlings. <i>Annals of Botany</i>	
	Williams, P. J., Zipkin, E. F., González-Melo, A., Salgado-Negret, B., González-M., R., Norden, N., Cely J.M. ... Umaña, M. N. (2025). Ontogenetic shifts in wood anatomy and leaf traits in tropical dry forests. <i>New Phytologist</i> , 249(2), 848-859.	
	Cely J.M., Umaña, M. N., Norden, N., González-M., R., Pizano, C., & Salgado-Negret, B. Seedling Trait Variation and Functional Space Occupation Responses to Topographic Water Shifts in a Tropical Dry Forest. <i>Biotropica</i> , 2025.	
	González-Melo, A., Salgado-Negret, B., Norden, N., González-M., R., Benavides, J. P., Cely J.M., ... Umaña, M. N. Linking seedling wood anatomical trade-offs with drought and seedling growth and survival in tropical dry forests. <i>New Phytologist</i> , 2025.	
	Puentes-Marín, J., González-Melo, A., Salgado-Negret, B., González-M., R., Abad Ferrer, J., Cely J.M., ... Umaña, M. N. Demographic Similarities Between Self-Standing Liana and Tree Seedlings in Tropical Dry Forests of Colombia. <i>Plants</i> , 2024.	
TEACHING	Graduate Instructor, Principles of Ecology (EEB-548) Fall 2025, Fall 2026	
	Graduate-level course covering foundational ecological theory.	
TALKS	Association for Tropical Biology and Conservation - ATBC 2025. (Oaxaca, Mexico) 2025	
	Cely J.M., González-Melo Andrés, Umaña Natalia. Linking Water Transport with Plant Function and Performance in Dry Forests.	
	V Latin American Congress on Ecological Restoration. (Bogotá, Colombia)	2023
	Cely J.M., Umaña N.M., Salgado-Negret B. Influence of topography on traits and functional strategies of seedlings in the dry forest: contribution to restoration.	
	Colombian Association of Biological Sciences. (Sincelejo, Colombia)	2022
	Cely J.M., Umaña N.M., Salgado-Negret B. Influence of topography on intra-specific variability of functional traits in seedlings of tropical dry forest.	

AWARDS	Scholarship , Organization of Tropical Studies	2024
	Awarded to attend graduate course in Ecology and Conservation. (\$7,900 USD)	
	Scientific Writing Scholarship , ONG SELVA	2024
	Scholarship supporting participation in scientific writing training. (\$600 USD)	
	EEB Block Grant 2025 and 2026 , University of Michigan	2025, 2026
	Funding support for graduate research. (\$1,300 USD)
